SUMMARY

Results-driven Full-Stack Developer with 4+ years of expertise in the end-to-end Laravel ecosystem, from API development and testing to deployment and hosting. Proven track record of leading the development of high-impact web applications, leveraging modern frontend tools like Vue.js, React.js, and Tailwind CSS with Flowbite.

EXPERIENCE

Full Stack Developer

CelebrateRecovery - Contract June 2025 - August 2025, Westlands

- Developed and maintained a ticketing system that saw over 900 users register and attend the event.
- Managed ticketing scaling and training the ticketing team at the entrance
- Payment confirmation and allowed for donations.

Full Stack Developer

DyvaxHub - Contract July 2023 - November 2023, Westlands

- **Website Development:** Architected and implemented a feature-rich website, optimizing the user experience and enhancing overall brand visibility.
- **Learning Platform Development:** Currently leading the development of an innovative Learning Management System (LMS) that incorporates cutting-edge features for students, tutors, and administrators. Introduced computer adaptive tests, providing personalized assessments for students based on their individual learning abilities.
- **Multi-User Environment:** Engineered a secure multi-user environment, accommodating students, tutors, and administrators with distinct roles and permissions. Implemented a seamless authentication system to safeguard user data and ensure controlled access to various platform features.
- **Payment Processing Integration:** Integrated robust payment processing functionality to facilitate seamless financial transactions within the platform. Ensured the security and reliability of payment transactions, providing a smooth and trustworthy experience for users engaging in premium content and services.
- **Interactive Learning Tools:** Introduced interactive learning tools, including flashcards, mock exams, and a comprehensive certification system to validate student achievements. Enhanced engagement and knowledge retention through the incorporation of gamified learning elements.
- **Scalability and Future Expansion:** Developed a scalable architecture, laying the foundation for future expansion and the incorporation of additional features and modules. Collaborated closely with cross-functional teams to gather requirements and align technical solutions with the company's strategic goals.

Full Stack developer

Kauye Solutions - Contract December 2023 - June 2025, Kenya

- Developed a comprehensive property management software using Laravel as the backend framework, encompassing essential features such as billing, tenant breakdown, invoicing, and ledger functionality.
- **Implemented a robust billing system** that accurately calculates and tracks all monies expected per apartment, including rent, utilities, maintenance fees, and additional charges, providing clear visibility into financial transactions.
- **Generated professional invoices automatically** based on the billing information, ensuring timely and accurate invoicing for tenants while streamlining the payment process.
- **Designed and implemented a secure and reliable ledger system** to manage financial records for landlords,

allowing for efficient tracking of income and expenses on a per-apartment basis, ensuring transparency and accurate reporting.

- **Integrated a task scheduling feature** enabling efficient organization and management of property-related tasks, such as maintenance requests, inspections, and rent collection deadlines, improving operational efficiency and ensuring timely task completion.
- **Led end-to-end development** for multiple client projects, managing the full software lifecycle from requirement gathering and architecture design to deployment and maintenance.
- **Student Placement Portal:** Designed and developed a full-stack platform connecting international students with Australian universities. Engineered a scalable Laravel backend with RESTful APIs and built a responsive, dynamic frontend using Vue.js and Tailwind CSS.
- **API Development** that servers inhouse that allows access to 25000 courses across 50 universities in 20 cities.

Full Stack Developer

New Horizons Wifi - Contract January 2023 - April 2023, Kikuyu

- **Developed and implemented a comprehensive CRM system:** streamlining data management and fostering business efficiency. The system, designed for scalability, features user-friendly interfaces tailored to meet specific business needs.
- **Designed and integrated text reminder:** Conceptualized and integrated an automated text reminder feature into the CRM system, enhancing customer engagement and retention.
- **Integrated popular payment gateways:** Seamlessly incorporated widely used payment gateways, including MPESA, to facilitate secure and convenient transactions within the CRM system.
- **Developed an expense tracker:** Engineered an integrated expense tracking module within the CRM system, enabling users to monitor financial transactions in real-time, contributing to informed decision-making.
- **Implemented customer maintenance features:** Designed and implemented features for logging and tracking customer issues within the CRM system, facilitating efficient resolution.

Network Architect

New Horizons Wifi August 2020 - January 2023, Kikuyu

- Secured connections between the client and company servers while also ensuring the security of servers through the installation of remote access.
- Implemented a network security plan that increased security and decreased vulnerabilities.
- Managed a team of network architects in designing and implementing a new network.
- Led a team of network engineers in designing and implementing a network infrastructure for a new data center.
- Designed and implemented a network infrastructure for a new data center.
- Debugged network and provided faster connection times.
